## Experience

---

**PHP Programmer** February 2018 – Present  
**Apollo Interactive** Los Angeles, CA

Currently working with the lead generation programming team, integrating new lead buyers into the system through external APIs, optimizing web pages to collect lead information, creating/updating custom back-end reporting and analytics tools.

**Web Developer and Designer** January 2016 – May 2017  
**Sperling Interactive** Salem, MA

Developed and designed both WordPress sites and static HTML sites for clients based on project proposals. Extended WordPress functionality by creating custom WordPress plugins and PHP back-end web applications to fulfill unique client requirements.

**Solution Support Engineer** April 2015 - December 2015  
**Associate Support Engineer** June 2014 – April 2015  
**Demandware** Burlington, MA

Worked in the solution support team assisting customers with custom code implementations and solutions. Fixed bugs and developed code solutions for customers to extend Demandware core functionality. Worked extensively in proprietary Demandware programming language as well as Javascript.

**Support SaaS Engineer Intern** May 2013 – August 2013  
**Demandware** Burlington, MA

Worked in the product support team resolving customer issues and inquiries relating to the Demandware E-Commerce software as a service product.

**Lead Web Developer and Designer** September 2012 – April 2014  
**Champlain College Publishing Initiative** Burlington, VT

Led the team of web developers for the company. Responsible for delegating work to other developers and maintaining the website. Worked closely with the graphic design team in redesigning the website.
